Description

This VELUX GGU MK08 0062 78 x 140cm Triple Glazed Noise Reduction White Centre Pivot Roof Window is created using high-quality moulded polyurethane with a stylish white lacquer finish. Easy to install and operate, pivot windows hold the ability to dramatically improve a room; they're one of the best ways to add natural light, ventilation and a feeling of openness to your under roof spaces, and also make it possible to place furniture directly below the window without obstructing the operation of it. For easy cleaning of the external pane, the openable roof window can also rotate 180 degrees and locks securely in position. These modern VELUX windows are also impressively easy to maintain thanks to their moisture-resistant white paint that encases a heat-treated timber core, making them suitable for humid rooms such as bathrooms and kitchens. The triple-glazed element of these windows makes them a must-have for those living in busy, built-up neighbourhoods, with a combination of laminated glass and extra thick glass helps provide a significant, audible reduction of rainfall sound and much-improved thermal insulation. The window is also designed with an inner, laminated pane so that if an object was to hit the window with force, the glazing would hold in place, much like a car windscreen, until you're able to get it fixed.

Key Features

- Centre pivot, manual operation
- Polyurethane around a timber core
- VELUX ThermoTechnology™ insulation
- High quality, low maintenance white finish
- Ventilation flap and integrated dust and insect filter
- Suitable for installation in roof pitches between 15° - 90°
- Easy to operate via the top control bar even with furniture under the window
- Thicker laminated inner glass pane designed to increase resistance to burglary
- Bright white finish with discreet wood grain matches perfectly with modern interiors
- Laminated inner glass is designed to hold the fragments together if the glass breaks
- The anti-dew coating significantly reduces the days with dew on the outer glass pane
- Keeps in the heat during winter and protects against the risk of overheating during summer
- Fresh air can get into your home through the ventilation flap even when the window is shut
- A combination of laminated glass and optimal glass thickness provides better sound insulation
- For easy cleaning of the external pane, the roof window rotates 180 degrees and locks in position
- Low energy glazing provides reduced heat loss through the window and enhanced indoor comfort
- Toughened outer glass pane makes your glazing more resistant to hail, heavy wind and snow loads
- Inner laminated glass protects materials behind the glass against UV radiation and delays materials fading
- The combination of laminated glass and extra thick glass helps provide a significant, audible reduction of rainfall sound

Technical Information

Rotates: 180°

Glazing: TripleControl: Manual

Uw [W/m²K]: 0.81

Operation: Centre pivot

Size (cm): 78 (W) x 140 (H)

Internal finish: White lacquer

Suitable for roof pitches: 15° - 90°

Material: Polyurethane around a timber core

External finish: Grey Aluminium (RAL - 7043)
