

NOTES:

New highway access to be formed to current Cumberland Council Highways Standards, to provide visibility splays of a minimum 90m, with parking area formed from back edge of footpath, in tarmacadam, with ACO drainage channel across entrance, to ensure no discharge of surface water from drive to adopted highway to 1cu.m volume soakaway and to be inspected by the Area Surveyor during construction and on completion.

Work to be carried out by an approved contractor who should undertake full site investigation, prior to any excavation, to ascertain position of any underground service:
