

Frame Details

Highly durable and incredibly strong is the sum of carefully selected components manufactured to the exacting standards on one of Europe's most technologically advanced production lines-right here in Britain.

The result of years of research and development, is subject to stringent testing to ensure that each and every product is fit for purpose. The homogeneous structure of a high impact PVCu framework with thermally welded joints provides integral strength which is further increased, where necessary through the incorporation of fully galvanised steel reinforcement into the multi-chambered structure of the profile. The cutting-edge design features triple brush seals plus anti-jamming bar both for the sliding upper and lower sashes.

The innovative design of our vertical sliding sash windows means that they can easily be cleaned and maintained from within your home.

As well as sliding up and down both sashes tilt inward allowing easy access from inside your home. The comfort of knowing that you've chosen the right product for you and your home is a comfort indeed. Multi-chamber frame construction acts as an efficient thermal and acoustic barrier for a warmer, quieter home environment.

Class leading security and safety devices that significantly reduce the risk of forced entry and minimise the dangers of potential hazards. When it comes to choosing a style that's right for you, the choice is almost endless. Frame design, frame colour, beading, glass and decorative finishes. Cumbría Superglaze enables you to purchase quality products that will suit your property and satisfy your personal tastes.

Sliding Sash Features
